## **Report on International Conference**

**Title :** " Business Education and Training "

**Description :** The Swiss School of Business and Management (SSBM) and Ajeenkya DY Patil University (ADYPU) are collaborating to coordinate the Business Education and Training conference, which will concentrate on the integration of artificial intelligence (AI) into professional training and business education. The objective of this conference is to unite educators, corporate trainers, and AI specialists in order to investigate the ways in which AI can improve training outcomes, personalize learning experiences, and enhance teaching methodologies in the business sector. Innovative AI tools and techniques that facilitate effective learning in business education will be the focal point of the event.

**Date :** 8th Jan 2022 to 10th Jan 2022

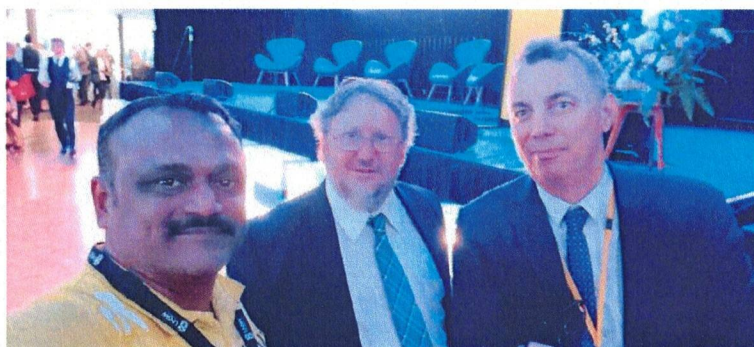

**No. of Days :** 02

**Event Summary:** Educators, corporate leaders, and policymakers convened at the Business Education and Training Conference to investigate the changing landscape of business education and professional training. The conference underscored the necessity of curricula that are in accordance with industry requirements, with an emphasis on the development of skills such as leadership, digital literacy, and entrepreneurial thinking. The sessions underscored the significance of continuous upskilling in a swiftly changing global economy, the integration of technology in learning, and the increasing role of experiential learning through internships and real-world projects. The event provided attendees with practical insights on how to more effectively prepare students and professionals for the challenges of contemporary business environments.
