Activity Report

Event Title: Workshop on Project making

Organized by: Object Automation Chennai, with Ajeenkya D Y Patil University.

Date: 06 Feb to 07 Feb 2023

Venue: Room No. 410, ADYPU

Faculty Coordinator: Prof. Anant R. More

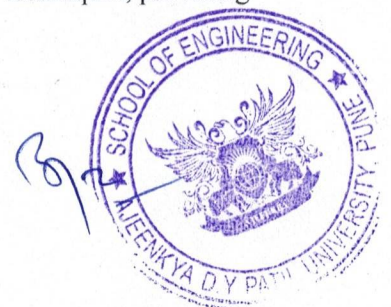

Participants: Students (2nd, 3rd and final year).

Objective:

The primary objective of the workshop was to provide students and participants with hands-on experience in project development, focusing on practical aspects of project execution. It aimed to bridge the gap between theoretical knowledge and real-world application, while enhancing participants' skills in automation, project management, and innovative problem-solving.

Agenda:

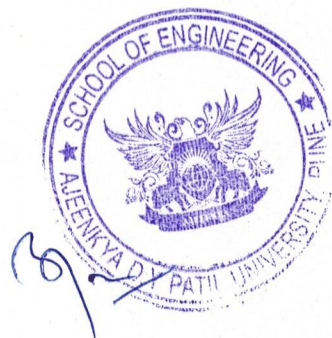

- **Introduction to Project Planning and Management**
Overview of essential steps in planning, managing, and delivering projects efficiently.
- **Hands-on Session on Automation Tools**
Demonstration and application of industry-relevant automation tools provided by Object Automation.
- **Project Lifecycle Management**
Discussion on various stages of a project, from inception to completion, and how to handle each phase effectively.
- **Case Study Analysis**
Exploration of successful projects developed using automation techniques, providing practical examples to participants.

- **Team-based Project Development Exercise**
Participants were grouped into teams to work on real-time project simulations, encouraging collaboration and innovation.
 - **Q&A and Feedback Session**
An interactive session for resolving queries, sharing insights, and gathering feedback from participants.
-

Outcomes:

- **Enhanced Project Development Skills**
Participants gained valuable practical experience in planning and executing projects, with a focus on automation and real-world challenges.
- **Improved Technical Competency**
The workshop provided exposure to modern automation tools, empowering students to use these technologies effectively in future projects.
- **Collaboration and Teamwork**
Through team-based exercises, participants enhanced their ability to work collaboratively in teams, a crucial skill for project management.
- **Industry Insight and Professional Guidance**
Participants received expert advice from professionals at Object Automation, offering a deeper understanding of industry expectations and trends.
- **Innovative Problem-Solving Techniques**
Attendees learned how to apply creative and practical solutions to real-life problems, increasing their ability to tackle complex challenges.
