CARRER DEVELOPMENT CELL

CARRER DEVELOPMENT CELL

The mission of a career development cell typically revolves around empowering individuals to achieve their professional goals through various means such as:

Guidance and Counselling: Providing personalized guidance and counselling to help individuals explore career options, understand their strengths, and align their career paths with their aspirations.

Skill Development: Offering workshops, seminars, and training programs to enhance essential skills such as communication, leadership, problem-solving, and technical expertise.

Networking Opportunities: Facilitating connections with industry professionals, alumni, and potential employers through networking events, career fairs, and mentorship programs.

Industry Insights: Keeping individuals updated on industry trends, job market dynamics, and emerging career opportunities through regular updates and information sessions. The objectives of a career development cell typically include:

Career Guidance: Providing personalized guidance and counselling to help individuals clarify their career goals, understand different career paths, and make informed decisions.

Skill Enhancement: Offering workshops, training programs, and skill development sessions to enhance individuals' employability by improving their soft skills (communication, teamwork, leadership) and technical skills (industry-specific skills, certifications).

Networking Opportunities: Creating platforms for individuals to connect with industry professionals, alumni, and potential employers through networking events, career fairs, and mentorship programs.

Career Resources: Providing access to resources such as resume building, interview preparation tips, job search strategies, and career assessments to equip individuals with the necessary tools for job hunting and career advancement.

Industry Insights: Keeping individuals updated on current industry trends, job market demands, and emerging career opportunities through seminars, guest lectures, and industry visits.

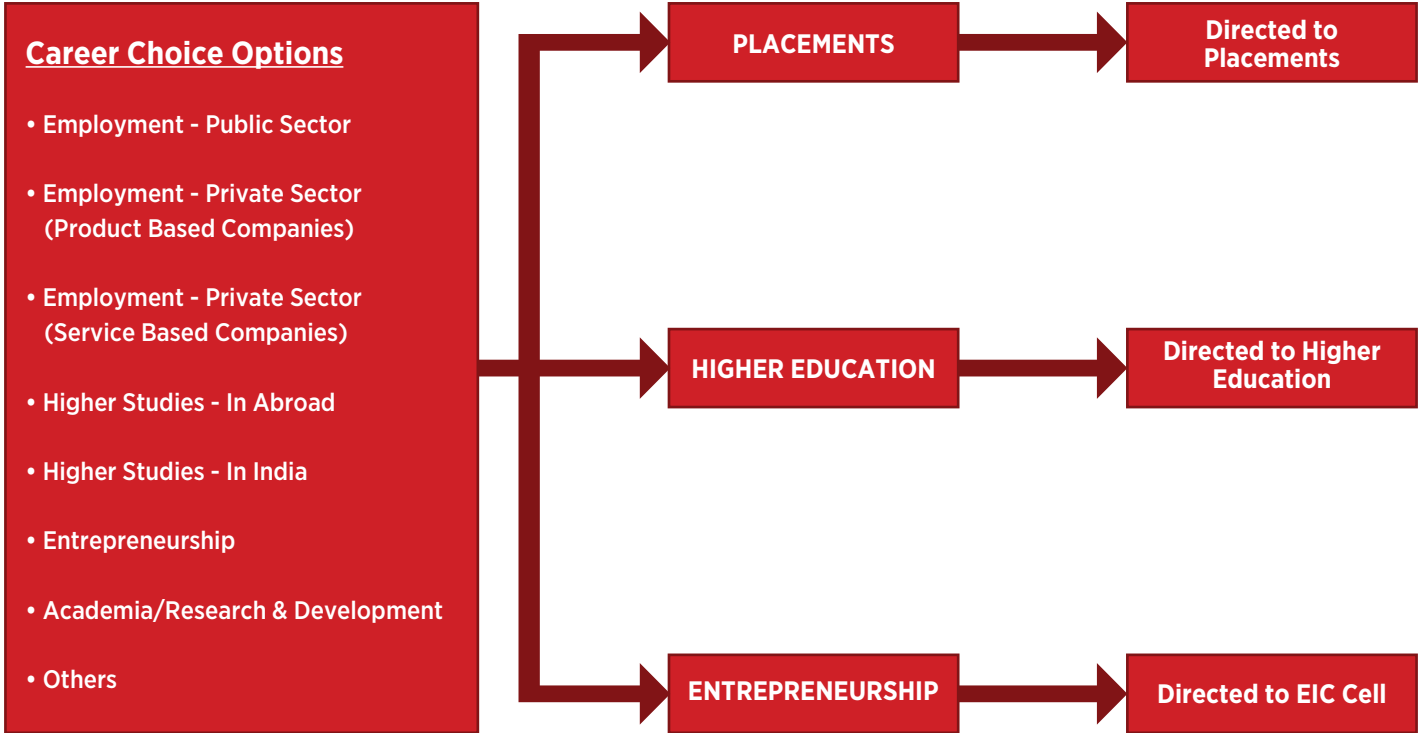

Professional Development: Encouraging continuous learning and personal growth through seminars, workshops, and certification programs that enhance professional competencies and readiness for career progression.

Promotion of Entrepreneurship: Encouraging entrepreneurial spirit and providing support for aspiring entrepreneurs through workshops on entrepreneurship, business plan competitions, and start up incubation programs.

ROADMAP

ABOUT INDUSTRIAL PRACTICE SCHOOL

Internship is an integral part of the academic curricula. Its satisfactory completion is a mandatory requirement for the degree to be awarded by the University. Further, depending upon the curriculum structure of various programs within the University, multiple Internships may be required in summers/one full semester/one year internship and may be assigned academic credits/grades within the curricula. The general structure of the internship(s) requires the students to undertake an immersive assignment within the assigned organizations for a limited period.

All the students of our university has to compulsorily undergo Summer internships for a period of 4 to 5 weeks either in summer Break of Second year or third year depending upon on the curriculum structure of various programs.

Final year Engineering and Non Engineering streams students will undergo Industrial Practice School (IPS) either in Odd or in even semester for duration of 3-4 months. Similarly, from A.Y. 2020-21 students are going for Internship in which company offers them 3 to 11 months of internships followed by full time conversion depending on the performance of the candidates during the internship period. The Program carries a weightage of 6 credits for one semester and 12 credits for one year internship program. IPS program is a valuable learning component in our academic program. Talking of Indian Engineering Graduates, employers complain that their on the job performance in their first job is substandard, lack ambition and have limited productivity. Our University does not want to produce such graduates. Hence, this concept of IPS program is aiming at producing engineers who fit the organizational requirements of leading engineering companies.

During the internship, each student can focus on the following parameters and develop: Problem solving, critical thinking, innovations, Curiosity to learn, Communication skills, Team work, Responsibility, Professional and Ethical behavior Attitude and Discipline.

Industrial Practice School is a prelude to final placement efforts. It is during this Semester of exposure to the industry that our students can make a mark of hard work, sincerity, commitment on the host organization. Industrial Practice School program would be a great learning experience since it enables students to apply theory to practice, observe, and learn the contemporary developments in technology and Industry practices. During the internship program, every student will be constantly guided and monitored by a University Guide and a Company Guide for successful training and completion of the program. For any other technical guidance/help, students can contact their concerned department through their Department Coordinator. Department Committee will help the student right from the finalization of title of the work, providing any technical support during the IPS program, conducting interim evaluation and final evaluation. We believe that, as always, the students and their Guides will put their best foot forward to make Industrial Practice School program successful by making it valuable to the Companies. Ajeenkya D.Y. Patil University will always provide all the support whenever required, for making Industrial Practice School programs a winning proposition to all the stakeholders. Below is the program wise summary of the internships of last five years.

INTERNSHIP SUMMARY

Course	2018-19	2019-20	2020-21	2021-22	2022-23
SOA	-	-	1	6	31
SOD	7	10	12	13	15
SOE	64	16	84	106	211
SOFM	13	30	25	23	40
SOHM	20	17	20	30	35
SOL	26	39	40	36	65
SOLA	-	-	-	13	17
SOM	24	30	45	36	60
Grand Total	154	142	227	263	474

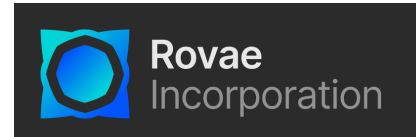

CENTER FOR INNOVATION, INCUBATION & ENTREPRENEURSHIP

12 Startups by Ajeenkya D.Y.Patil University

- Yolohealth
- SHRID_Electric_Bike_Rentals
- Clavictor Academy Pvt Ltd
- M/s Rovae Incorporation
- SCADS Technology
- Wheels_PAwFesct
- Café_Delicious
- Sizzling Skewers
- Bioplastic from Biowaste
- Co Lyf
- Rigbetel Labs LLP
- Trolific

SKILL DEVELOPMENT

Campus Recruitment Trainings both by In-House Faculty as well as by valued external training agencies is given on campus for students opting for placements

OTHER SKILL BASED TRAININGS PROVIDED ON CAMPUS

1

Communication & Soft Skills

- Verbal
- Quantitative
- Aptitude
- Reasoning skills
- Logical Skills
- Critical Thinking Skills
- Complex Problem solving skills
- Listening, Reading, Speaking & Writing (LRSW) Skills

2

Life Skills

- Behavioral Skills
- Attitude
- Human Values
- Etiquettes
- Self-Grooming
- Inter and Intrapersonal skills
- Body Language

3

Hobbies Based Skilling

- Music
- Fine Arts
- Dance
- Dramatics
- Public Speaking
- Sports & Games
- Yoga
- Social Service

Cambridge English Certifications are integrated into Curriculum

IELTS, CAT, MAT, GMAT, GATE, UPSC etc. Competitive Exams Coaching is given in Campus at highly subsidized training cost compared to market
